

which is made under his research and development. The new hull costs Retail \$3,250 and you have to add the price of the hood \$600 to pick it up all together. Additionally there is available a super light construction where hull and deck are made out of carbon fiber and the whole craft weighs 60-72 pounds and it costs \$5,850. If anyone is interested he has to contact Craig Warner at WWRProducts.com (Craig@wwrproducts.com).

> Homemade steering from Tottewitz
Axel and Robert Tottewitz from Germany had an fit an aftermarket steering pole made from a well known American company which did not last for long. Therefore, they design their own part and securely bolted on the bottom of the previous one. They run this particular design for two years and they still use it without having any unexpected issues. The design is available in two options, the short and long one.

> We tested Pastorello's Ultra 300X
Right after the finish of last moto of Akropolis Jet Raid 2013 we tested exclusively Jean-Bruno Pastorello's race boat. Why this race craft is so good and reliable? What are the major factors that make it unbeatable? The story is published on Race Tests section.
